Art Unit: 2157

1. The amendment filed on 2/14/2007 and the terminal disclaimer filed on 3/12/2007 have been entered and considered by the examiner.

2. Claims 1-8 & 10-13 are presenting for examination.

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-8 & 10-13 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The address configuration table having different fields is in itself non-functional and thus lacks utility i.e. there is no tangible result. The examiner recommends to amend claim 1 to include the limitation of -- wherein a connection is established from a first source device in the source network to the destination device in the destination network using the address configuration table -- in order to provide a tangible result for the claim.

4. Claims 10-11 should depend on claim 6 (not the canceled claim 9).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Moustafa M. Meky whose telephone number is 571-272-4005. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on 571-272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
